

Workshop aim:

The workshop targets to bring activities of in-situ measurements, in particular of glacier mass balance components, together with remote sensing and modelling activities.

The workshop shall provide an informal environment with time for discussions and exchange of knowledge and/or data. Each participant shall briefly introduce her/his activities with a short talk.

Contact / venue:

Institute of Geography
Friedrich-Alexander-Universität
Erlangen-Nürnberg (FAU)
Wetterkreuz 15
D-91054 Erlangen, Germany
F: +49-(0)9131-22013
P: +49-(0)9131-22015
matthias.h.braun@fau.de

Topics:

- ◆ Glacier melt
- ◆ Glacier surface mass balance
- ◆ Mass flux estimates
- ◆ Contribution to sea level rise
- ◆ In-situ observations and measurements
- ◆ Shallow ice core records
- ◆ Climatological observations
- ◆ Snow/wind drift
- ◆ Modelling approaches
- ◆ Remote sensing
- ◆

Registration:

Please confirm your participation by providing a presentation title by **May 15th, 2014**.

Antarctic Peninsula Glacier Mass Balance Workshop

Call for contributions

June 5/6, 2014

in Erlangen, Germany

Institut für Geographie

Tentative schedule:

Thursday, 05 June, 2013

13:30 Welcome & introduction
In-situ measurements

15:30 *Coffee break (30 min)*
Modelling approaches

18:00 *approx. end of session*

19:30 *Joint dinner*

Friday, 06 June 2013

09:00 Remote Sensing

11:00 *Coffee break (30 min)*

Joint discussion on synergies, activities, project plans, developments & data exchange,

13:30 *approx. workshop closing*

Accommodation:

Please book accommodation yourself. Hotels at different price levels are available. At the date of the workshop, hotels might be booked due to the coinciding opening of the „*Erlanger Bergkirchweih*“ - the local beer festival (a smaller variation of the Oktoberfest).

The FAU Institute of Geography is located about 8 km south of the city centre. Information on public transport can be found at <http://www.vgn.de/>.
